

PRODUCT N: 1.308

GELMAN-81

HAND CLEANING CONCENTRATED GEL

CHARACTERISTICS

GELMAN-81 is a concentrated cleaner in viscous gel form. It's yellow coloured and orange scented. Its formulation base are anionic and non-ionic tensoactives, amides from coconut fatty acids, humidifying agents and emulsifying agents which are skin caring all of them. It contains no free alkalis, solvents or abrasives. Avoids unnecessary skin aggressions when cleaning medium and light dirt since it avoids strong degreasing caused by solvents and erosions caused by some abrasives which take part in other products formulations.

Due to its high cleaning power, its high active materials contents and its ability to dissolve in water, **GELMAN-81** is a product with a high yield and great performance, even when it's used water diluted, in cleaning every type of dirt on hands, when working in factories, offices, workshops, etc.

Biodegradable product N.R.S. 37.00207/M-03705

USES

General use in cleaning and hand care when they're stained with general dirt, especially in industries, offices and institutions.

METHOD OF USE

GELMAN-81 has been thought to be used as it's supplied or water diluted. In these cases, it's recommended to mix with 2-3 parts of water and use it through hand or automatic dispensers which allow an easier application and the use of the precise quantity needed for the cleaning. This also provides safer conditions.

Apply a small amount of **GELMAN-81** on wet hands and wash them, thoroughly rubbing until removing the dirt. Finally rinse with abundant clean water. The hands end up clean and lightly scented.

Industrias Químicas

SATECMA[®]s.a.

PRECAUTIONS

Don't swallow. Keep out of the reach of children. Non-compatible with cationic products. Don't mix with other products.
