Solvent and propellent c.s.p..... 100

DGSP registry nº::: 99-30-01809 y 99-30-01809 HA

APPLICATION FIELD

TECMA INSEC-SP is recommended for treatments in homes, schools, public places, cafes, restaurants, hotels and in the foodstuff industry in general, in order to control cockroaches and other crawling insects.

METHOD OF USE

Before using, read carefully the label.

Clean the surfaces where the product is going to be applied. Spray on the surfaces from a distance of about 25 cm keeping the can as vertical as possible. Create areas of about 10 cm wide in skirting boards, doors and windows, furniture and counters, and all the passing ways for insects.

PRECAUTIONS

Being a product in aerosol, it'll be necessary to follow the instructions for this type of pressure container. Never expose to temperatures higher than 50 °C. Do not spray towards flames or ignition sources..

PACKAGING

650 cc aerosol cans.
